*Angela | videographer*

We are Jason & Angela Wilson of greenroot pictures

We make cinematic videos and commercials to help you share a message. Whether you are looking to sell or charter your yacht, a video is a very contemporary approach to accomplishing that goal. Offering brokers, potential buyers and charter guests an opportunity to connect; giving them a unique glimpse into why your yacht is special! It helps them to realize why they want to call your broker and schedule an appointment or book a charter...all while allowing the boat to continue its cruising schedule - uninterrupted. Regardless of the boats location, or that of the client, your yacht will still get exposure.

Buyers and charter clients have a lot of options in today's yacht industry. Having a professional video presentation for your website will help promote your yacht and help you see a return on your investment.

All footage is captured in HD using Canon 5D MarkIII's, top of the line Canon lenses, gyroscopic stabilizers, steadicams and sliders.

We were fortunate to film the private motor yacht Our Toy in the Spring of 2012 for her Owners. A link to that video is below:
